The Oil Factor	SoapQueen presents Rosehip oil - cold pressed. One of our favorites, this classic ingredient has been building momentum across the industry & for good reason. This particular grade is called "O Colour" as it is more ORANGE in colour due to less of the pulp being used in the pressing of the oil. People prefer a more orange grade (this grade) as it is easier to formulate with due to less red intensity. Both colour options are available. Wild harvested, this oil is handpicked & then lightly pressed to produce a golden-red tinted oil. With regards to our Canina grade, the hips are dried, cleaned & then lightly cold pressed. Rosehips are known to have a vast vitamin A & E content hence its popularity in formulations. Often referred to as a 'tonic' oil, if it is not in your formulation, we recommend serving this oil just as it is & applied directly to the skin & face. It is a diuretic oil containing trans-retinoic acid which carries many a therapeutic property. It has been used for centuries as a skin cell & tissue repairer hence its growing popularity. You can now see why it is not an oil you want to ignore.
Functionality	Wild harvested & hand picked. Rich in vitamin A & E & trans-retinoic acid, making it a super 'tonic' oil. Odourless, golden & with a red tint. Best applied directly to the face & body. Used for centuries as a skin cell & tissue repairer.
