### PRODUCT INFORMATION

Bentonite Clay - Food Grade - Bentoniet Klei - Food Grade

**Part Number: 70212 - OGR13**

The above product is natural clay and is a complex hydrated silicate and comprises aluminium and magnesium silicates together with other silicates. Product has a high percentage of sodium in the crystal lattice and is classed as sodium bentonite. Product is formed as a result of chemical changes in ancient volcanic rock and is mechanically mined.

Bentonite Clay BP does not contain, is not produced, nor comes into contact with materials derived from animal source or GMO materials and is produced without the use of metal catalysts, reagents or solvents. Product is natural and free from added materials.
